

StatsVille Game Instructions:

Go to the web site: <https://stat2games.sites.grinnell.edu>.

Then select the **StatsVille** and then click the **Play StatsVille** button.

This site may take a few minutes to load.

- Enter a **Player ID** and a **Group ID**. Any combination of alpha-numeric characters will work. *Note that this ID will be public on the web.*
- Select a level
- Player can choose to show p-value or not
- Click the blue **Start** button: 

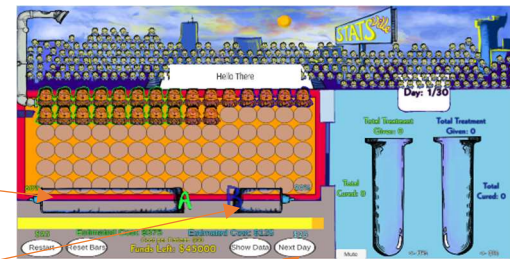

This will bring you to the **game** page.

Goal: The StatsVille is usually filled with happy creatures. But lately, they have been getting sick and coming to our health clinic. The goal is to cure as many patient as possible and have less than 5 patient.

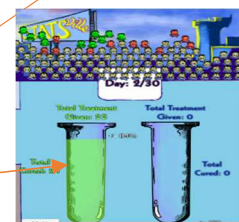

Select treatment: You can use either use treatment A, treatment B, or treatment A and B combined.

- Pull the left slider with sign "A" on it to the right to give treatment A.
- Pull the right slide with sign "B" on it to the left to give treatment B.
- To **combine medicine**, put both right and left slider.

Give treatment: Press the next day button to give treatment for that day.

Check progress: Players can keep track of number of treated on the right panel.

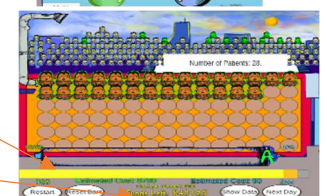

Cost: Each treatment will cost different amount of money. Player can check the cost at the bottom.

Fund: Player can check the fund available for treatment at the bottom.

Restart: Player can restart the game by pressing the **Restart** button.

Reset: Player can reset the treatment sliders by pressing the **Reset Bars** button.

Game data: Player can check the game data by pressing the **Show Data** button.
